Summary

Highly-motivated and detail oriented iOS developer, but also curious about everything. My goal is to create features with the user in mind, building apps with easy to use user interfaces and intuitive user experience. I also know why it is important to write readable and easily maintainable code. I am constantly following the iOS scene and I am up-to-date with the best practices related to UI and also to development. I am also interested in the server side development.

key skills and competencies

- Objective-C and Swift knowledge
- Knowledge of modern iOS SDKs (Cocoa Touch, Core Data, etc.)
- Using SOLID principles as well as deep knowledge of platform-specific coding conventions and patterns
- Ability to write clean, reusable, maintainable and readable code
- Good knowledge of source versioning
- Experience of Agile methodologies
- Strong problem solving and communication skills
- Continuously following the latest UI, UX and development trends

Work experience

iOS Developer, Kapaza! Belgium NV
Dates employed: Sep 2014 – Present
- Maintained the legacy codebase and helped transitioning to a new app. The app was developed globally with developers from more than five countries.
- Worked together with the designer, PO and API developers to build new features.
- Suggested and delivered improvements to the codebase.

iOS developer, Once Digital Arts Kft.
Dates employed: Aug 2013 – Sep 2014
- Subsidiary company of Bigfish. The mobile app development was moved to this company.
- The main focus was on the interactive storybooks but also had chance to work on business apps. The following storybooks used the same engine as our award winning first interactive app.

iOS developer, Bigfish Internet Technology Kft.
Dates employed: July 2012 – Aug 2013
- I was developing business apps for various clients. Also created a custom internal "App Store" where the clients could download the latest betas and test the new features.
- Did the R&D and the development of an interactive storybook for children. Kids could follow the story of Terka, who did not like the vegetables. The app featured high resolution animations. It won several awards in Hungary and Apple also put it on their featured page.

Intern, Intalion Kft.

Dates employed: Jan 2012 – July 2012

- Worked under the management of the Lead developer.
- Participated in .NET, Java EE and iOS projects. For Java and .Net my main task was to develop small subcomponents of the given system.

Education

Master of Science: Computer Science Engineering, Mayor of Security of Communication Systems

Budapest University of Technology and Economics

2014 | Budapest, Hungary

Bachelor of Science: Computer Science Engineering, Major of Communication Networks

Budapest University of Technology and Economics

2010 | Budapest, Hungary

Languages

- English - fluent,
- Hungarian - native

Projects

Two open source apps are available on my GitHub page. One is an iTunes companion Mac app and the other one is an iOS weather app. They are still under development.

I have worked on 10 different production apps. The detailed list is available on my LinkedIn page.
