KEY PROJECTS

GRoby iOS app | App Store
Official app for the G'Roby website. Users can manage their profile, browse the available products, make orders, manage their favorite lists and put items in the basket by scanning the product's barcode.

PaymentGateway Mobile SDK (iOS, Android) | Link
An iOS and an Android SDK for the mentioned payment solution.

Terri at the market | App Store
Apple selected this app and put it in their featured section in the App Store. It is an interactive child book which has high resolution characters and really detailed animations.

EVital iOS app | Video
Users can submit their prescription and the pharmacy will send back an offer. If the user accepts that offer, the pharmacy starts to prepare the package and later the user can pick it up.

Tankönyvtár iOS app | Video
It is an internal application made for education purposes. The helps to browse the contents of this website. You can download the pdfs and ebooks for offline reading. The documents can be annotated and bookmarked.

Terri's Coloring Pages | App Store
It is a coloring book for kids. It is a free app, has high resolution and zoomable images. Additional contents can be unlocked with in app purchase.

PimPim Seasons | App Store
A small universal application to promote the PimPim's World interactive storybook. It has 4 mini games in a winter theme.

PimPim's World | App Store
It is another interactive storybook for kids. It uses the same technology as Terry At The Market and has more interactive items per page.

Kapaza | App Store
My first task was to maintain the old legacy Kapaza app. Later we joined an international team and delivered the app that you can see in the App Store. We are solving bugs and continuously delivering new features for 4 countries. I am one of the main contributors.

Hooky | App Store
It started as an experiment to attract more youngsters to use Kapaza. We wanted to make the browsing of classifieds more fun. Tinder meets classifieds.
